

Tell me about the Digital change

What happens if I haven't switched to VoIP by Jan 27?

If you haven't made the move to VoIP by the time your area is switched off, you will lose all services reliant on the traditional network & this could include, Alarm lines, Fax Machines, PDQ (Credit card machines), Lift Lines, Internet (Certain Internet connections rely on analogue, such as ADSL2+ & Fibre to the Cabinet) and most importantly telephone lines!

Along with the telephone lines, the telephone numbers will also be disconnected and possibly lost as the telephone numbers are associated with the lines they are connected to!

These lines could be Analogue or ISDN2 & ISDN30 – All are going.

It is currently uncertain if & how these could be restored.

THIS IS HAPPENING – SO PLAN NOW
